GEH1022 GEOPOLITICS: GEOGRAPHIES OF WAR & PEACE

Geopolitics: Geographies of War & Peace introduces key ideas and contemporary themes of geopolitics. Geopolitics draws upon a lot of "popular" geopolitics materials in the form of video, film, blogs, images and other multi-media to illustrate key issues. Students will learn about the geography of conflict, war and peace-making in the twentieth century. Students will be led to understand the current and future trends and debates, including issues such as the New (and old) World Order, terrorism, peacekeeping and conflicts in and over 'cyberspace' and natural resources. The course introduces students to a wide-range of sources and encourages critical use of media, academic material and internet resources. The objective of the course is to develop a deeper and life-long understanding of the geography of international affairs.
